

Art Smart - 3rd Grade
January - People at Work

Project Idea: “The Door to Your Future” Inspired by Wyeth

Materials Needed:

Yellow or Blue cardstock
White paper or cardstock
Markers
Glue

Instructions:

Wyeth gave the viewer several clues about this subject’s profession just by showing us the subject’s belongings. Volunteers will cut a 4” x 9” door (that folds back) on a sheet of vertical pastel blue or yellow cardstock 9” x 12”.

Each student will be asked to think of what profession they might like to have one day. The student will draw items that might be associated with that profession on the construction paper with the door (e.g. a baseball player might have a uniform, a helmet, a bat, etc) When complete the students will glue a piece of white paper to the back of the door page. Be careful not to glue the door shut. Then the child will draw a picture of himself inside the open door. Children will use markers to color in their creations.
