

Art Smart - 5th Grade
December - Sculpture

Project Idea: Foil Figure Sculptures

Materials Needed:

Tinfoil (about 3 rolls per class)
Colored Cardstock
Glue (hot glue gun if available)
Markers/Pencils for shadow shading

Instructions:

Have kids sculpt a human form out of tinfoil in whatever position they want. Making sure that part of it will be solid/flat enough to glue to paper.

Glue the sculpture to a corner or one of the edges of the sheet of paper.

Have them think about how the shadow would look on the paper and draw that shape and fill in. You can use flashlight to help trace the shadow.
